

## European Hardwoods

### Oak

We stock mainly square edged Prime grade Oak in 26mm up to 80mm thick, in random widths and lengths.

A significant amount of our stock is FSC certified.

We also hold stock of pippy grade oak (pic) , in 27 and 54mm thick only. We supply strips and blanks.

We also offer engineered products in European Oak. Please see our Semi-Finished products page for more details.

### Beech

All of the Beech we carry is either PEFC or FSC certified.

Our main stock production is Pollmeier from Germany, which is all light steamed and surfaced 2 sides. We carry this in Superior Grade 2.45-3.05m lengths.

We also carry Superior Colour grade, a grade where colour variation is not considered a defect. This is carried in 52mm thick and 2.45m long, for use primarily in door manufacture.

Both unsteamed and dark steamed beech are available to order.

We can of course source on your behalf many other grades and specifications according to your requirements.
